AMENDMENTS TO THE CLAIMS

Claim 1 (Canceled)

Claim 2 (Currently Amended): The flat panel display of claim 16, further comprising: an insulating dielectric layer interposed between the inside surfaces of said front and rear glass plates.

Claim 3 (Canceled)

Claim 4 (Previously presented): The flat panel display of claim 16, wherein said metal heater

layer is patterned onto said TFT array layer.

Claim 5 (Previously presented): The flat panel display of claim 16, wherein said metal heater

layer is behind said black mask EMI layer.

Claim 6 (Canceled)

Claim 7 (Previously presented): The flat panel display of claim 16, wherein said metal heater

layer comprises a grid of intersecting horizontal and vertical lines.

Claim 8 (Previously presented): The flat panel display of claim 16, further comprising an

Application Serial No. 10/679,977 Reply to Non-Final Rejection of 6-25-2007

insulating dielectric over-coated onto said metal heater layer.

Claim 9 (Previously presented): The flat panel display of claim 16, further comprising:

at least one thermal sensor integral to said TFT array layer.

Claim 10 (Previously presented): The flat panel display of claim 9, wherein each said

thermal

sensor comprises of an array of diodes.

Claim 11 (Canceled)

Claim 12 (Currently Amended): A flat panel display comprising:

a front glass plate;

a rear glass plate;

a layer of liquid crystals interposed between said front and rear glass plates;

a TFT array layer interposed between said front and rear glass plates; and

a metal heater layer integral to said TFT array layer.

Claim 13 (Original): A flat panel display according to claim 12, wherein said metal heater

layer

is patterned onto said TFT array layer.

Claim 14 (Original): A flat panel display according to claim 12, where said metal heater

laver is

comprised of a grid of intersecting horizontal and vertical lines.

3

Application Serial No. 10/679,977 Reply to Non-Final Rejection of 6-25-2007

Claim 15 (Canceled)

Claim 16 (Original): A flat panel display according to claim 12, further comprising:

a black mask EMI layer interposed between said front and rear glass plates and wherein

said black mask EMI layer is electrically tied to zero potential and isolated from Vcom.

Claim 17 (Canceled)

Claim 18 (Previously presented): The flat panel display of claim 12, further comprising:

at least one thermal sensor integral to said TFT array layer.

Claim 19 (original): The flat panel display of claim 18, wherein said at least one thermal

sensor

is applied onto said TFT array layer.

Claim 20 (original): The flat panel display of claim 18, wherein each said at least one

thermal

sensor comprises an array of diodes.

Claim 21 (Canceled)
